

**AMENDMENTS TO THE SPECIFICATION:**

**Please replace the paragraph beginning on page 4, line 1 with the following amended paragraph:**

Purchasers are often left with a need for identification and cure of errors in commercially available software and hardware. In some instances, product manufacturers and suppliers actively solicit comments, improvements, detection and identification of errors, and the like. In other situations, manufacturers and marketers of products are not so forth coming. For example, occasionally, problems are comparatively esoteric, and may occur only in a few rare conditions or instances. Nevertheless, some errors occur with sufficient regularity as to seriously encumber users unaware of the existence of such product flaws.
